

Patent Intelligence Report

Generated 2026-07-09 · triage decision-support · not legal advice · run 7a389fa5d618

1. Target compound

Input SMILES	<chem>Cc1cn(cn1)-c1cc(cc(c1)C(F)(F)F)NC(=O)c1ccc(C)c(c1)Nc1cccc(n1)-c1cccnc1</chem>
Canonical SMILES	<chem>Cc1cn(-c2cc(NC(=O)c3ccc(C)c(Nc4cccc(-c5cccn5)n4)c3)cc(C(F)(F)F)c2)cn1</chem> [2]
Name	4-methyl-N-[3-(4-methylimidazol-1-yl)-5-(trifluoromethyl)phenyl]-3-[(4-pyridin-3-yl)pyrimidin-2-yl]benzamide
PubChem CID	644241

2. Executive summary

Novelty estimate	LIKELY-NOVEL (score 1.0)
FTO risk (triage)	LOW
Databases queried	surechembl
Patents retrieved	0

3. Database coverage

Sources searched: surechembl [3]

Not searched: pubchem (unknown source); epo_eps (unknown source)

4. Patent landscape

No patents retrieved from the searched databases.

5. Structurally similar compounds

No structural neighbours above threshold.

6. Novelty / non-obviousness estimate

Verdict: LIKELY-NOVEL **Novelty score:** 1.0 (1 = no close art)

No structurally related prior art found in the searched sources. Expand the corpus before relying on this.

Heuristic estimate for triage. Structural similarity is a proxy, not a legal test. Anticipation (novelty) and obviousness are determined by claim construction and examiner/attorney judgement.

7. Freedom-to-operate triage

Risk: LOW

No enforceable patent has a claim genus covering the target, and no structurally close in-force patents were found.

Decision-support triage only. This is NOT a freedom-to-operate opinion and NOT legal advice. Flagged patents/claims require review by a qualified patent attorney in each jurisdiction of interest.

This report is automated triage output. Structural similarity is a proxy, not a legal test; novelty (anticipation) and freedom-to-operate are legal determinations requiring review by a qualified patent attorney in each jurisdiction of interest. Coverage is limited to the databases listed above and to the sample/live data available at generation time.

Run ID 7a389fa5d618476b9add8a398cff1141 — see the audit manifest for the input hash, analysis fingerprint and artifact checksum.
